

Senior Mechanical Engineer Cohuna

Mawsons is a family-run business that produces quality construction materials throughout northern Victoria and southern N.S.W. We seek a motivated and confident person to join our professional engineering and fabrication workshop team based at Cohuna in regional northern Victoria.

In this permanent role you will be in a leadership role as part of a team (of 2 Mechanical engineers, a design draftsman, and a fabrication team) responsible for delivering capital projects such as facility upgrades and greenfield developments across our many quarry and concrete plants. This role will see the successful candidate undertaking detailed plant/process design that aligns with current industry trends and maintains compliance with relevant standards and regulation. Occasional travel is required for this diverse role for which a company vehicle will be provided.

The successful candidate will:

- Be a degree qualified engineer (preferably mechanical, suitable alternative is also possible for the right candidate).
- Have a minimum of 15 years demonstrated engineering experience in a multi-disciplinary environment.
- Possess a willingness to learn and work flexibly across other disciplines.
- Have experience in CAD/3D modelling essential, preferably SolidWorks.
- Have detailed manufacturing drafting experience.
- Have experience in forecasting and managing project costs.
- Possess excellent demonstrated communication and reporting skills.
- Have previous experience in a leadership role, preferably including both technical team leadership and project management.

A resource/mining/extractive industry background is highly desirable for this role.
